

## **Corporate Policy – Sustainability**

*At The Leela, our continuous endeavour is to reflect our values in every aspect – from the way each hotel celebrates the local heritage, culture, and natural materials of its location, revives time-honoured artisanal crafts, to the way our teams whole-heartedly participate in environmentally-friendly and charitable initiatives. Our CSR approach is inspired by a duty to our stakeholders to be a socially responsible partner with the highest integrity and ethics. We believe that our commitment towards socially sustainable practices generates real value for our shareholders, clients, employees, and society at large. We apply high environmental and social standards to our business to support a sustainable future. We seek to keep improving the environmental performance through the efficient use of resources and by applying world-class green practices across the board from hotel design and construction to procurement and operational policies. We believe in contributing and helping improve the quality of life for each community where we operate. We strive to reach new levels of corporate social responsibility year-on-year.*
